“Biostatistics, Why, When, How?”

Presented by

Soren M. Bentzen, PhD, DMSc, FASTRO

Professor of Epidemiology and Public Health & Professor of Radiation Oncology;
Director, Division of Biostatistics & Bioinformatics, Dept. of Epidemiology and Public Health;
Director of the Biostatistics Shared Service, UM Greenebaum Comprehensive Cancer Center;
Director of the Biostatistics Core, UMB Institute for Clinical & Translational Research;
Director of Translational Research, UM Proton Therapy Alliance;
University of Maryland School of Medicine

Quantitative biomedical research is increasingly a team science, requiring the expertise and skills of collaborators from a variety of disciplines and backgrounds. Biostatisticians bring to the team a strong foundation in statistics, mathematics, and computational methods, augmented by domain-specific knowledge of biomedical science. This presentation will discuss why or when a biomedical researcher may want to seek biostatistical collaboration/support for a research project and how to access the available support offered by the ICTR as well as other mechanisms.
